

## Set The Homework Percentage Worth For Biology Homework To '30%'

The screenshot shows a database management interface with a dark theme. The top navigation bar includes 'Administration' and 'Schemas'. The 'Schemas' panel on the left shows a tree view of the 'databaseproject' schema, with tables like 'assignment', 'course', 'department', 'distribution', 'enrollment', 'grades', 'student', 'Views', 'Stored Procedures', 'Functions', 'GradeBook', and 'sys'. The 'distribution' table is selected.

The main query editor displays the following SQL query:

```
1 UPDATE databaseproject.Distribution
2 SET percentage = 30
3 WHERE course_id = 104 AND assignment_type = 'Homework';
```

Below the query editor, the 'Result Grid' shows the data for the 'distribution' table. The columns are 'course\_id', 'assignment\_type', and 'percentage'. The data is as follows:

course_id	assignment_type	percentage
103	Homework	20
103	Test	50
103	Project	30
104	Participation	10
104	Homework	30
104	Test	50
104	Project	20
105	Homework	25
105	Test	50
105	Project	25
106	Homework	20

The 'Object Info' panel on the left shows the structure of the 'distribution' table:

Column	Type
Distribution_id	int PK
course_id	int
assignment_type	varchar(100)
percentage	float

The 'Action Output' panel at the bottom shows the execution of the query. The actions and their results are:

The status bar at the bottom indicates 'Query Completed'.
